SUMMARY

Full Stack Developer specializing in PHP and Laravel web application development, RESTful API architecture, and modern full-stack web solutions with React. Experienced in database design, role-based access control, social authentication, payment gateway integration, real-time notifications, caching, and automated testing with PHPUnit and Pest. Proven track record of building and deploying end-to-end projects including a virtual mentorship platform and an AI-powered full-stack e-commerce platform.

EDUCATION

Daffodil International University Sep 2022 – Sep 2026
Bachelor of Science in Computer Science & Engineering Dhaka, Bangladesh
CGPA: 3.49 / 4.00

Milestone College Jun 2019 – Dec 2021
Higher Secondary Certificate (HSC) — Science Dhaka, Bangladesh
GPA: 5.0 / 5.0

TECHNICAL SKILLS

Languages: PHP, JavaScript, Bash
Frontend: HTML5, CSS3, Tailwind CSS, Bootstrap, DaisyUI, Shadcn UI, React, Vue.js, Zustand, Axios
Backend: Laravel, REST APIs, Sanctum, Socialite (OAuth), Spatie Permission, Authentication, RBAC
Database & Testing: MySQL, PostgreSQL, Redis (Predis), PHPUnit, Pest
Tools & Integrations: Git, GitHub, Docker, Linux, Postman, Laravel Cloud, Vercel, SSLCommerz, ZegoCloud, Cloudinary, Pusher, DomPDF, Google Gemini API

PROJECTS

MentorChai — Virtual Mentorship Platform 2026
PHP, Laravel 12, MySQL, JavaScript, Tailwind CSS Code | Live

- Built and deployed a mentorship platform with student, mentor, and admin interfaces using role-based access control.
- Implemented mentor search, session booking and approval, reviews, and ratings.
- Integrated ZegoCloud video sessions, SSLCommerz sandbox payments, and real-time notifications using Laravel Echo and Pusher.
- Designed a 16-table MySQL schema and wrote PHPUnit tests for routes and models.

PonnoKini — AI-Powered Full-Stack E-Commerce Platform 2026
PHP, Laravel 13, React, Tailwind CSS, Zustand, MySQL, Pest, Gemini API Code | Live

- Built a full-stack e-commerce application with a Laravel REST API and a React storefront and admin dashboard, covering browsing, checkout, payment, order management, and post-purchase support.
- Implemented Sanctum token authentication, Google/GitHub social login, email verification codes, password reset, rate limiting, and role-based authorization (admin and customer).
- Implemented product management, search, filtering, pagination, Cloudinary uploads, and cached listings with cache invalidation.
- Developed order and SSLCommerz payment workflows with an IPN webhook, server-side price and stock validation, PDF invoices, and scheduled cancellation of unpaid orders.
- Added verified-purchase reviews, product Q&A, in-app notifications, and an admin sales analytics dashboard; supported English/Bengali and light/dark themes.
- Integrated Gemini AI for product descriptions and product/cart recommendations with fallback handling; wrote Pest tests for authentication, permissions, pricing, and reviews.
